 BIM
Bridge Inspection and Maintenance

Preparation for Inspection

Inspection Equipment

- Inspection Equipment – Level 2
 - portable ladders
 - base 1/4 of length from wall
 - do not work on top two rungs
 - base firm and non-slip
 - extension ladders proper overlap
 - scaffold
 - anchor properly
 - design = 4X load
 - inspect daily
 - safety harness – Level 2
 - adjust to fit
 - attach to fixed anchor
 - check prior to use
